

HOTHOUSE

FIR TOPICAL WARMING UNIT ENJOY THE COMFORT AND BENEFITS OF FIR TECHNOLOGY!

WHAT ARE FAR INFRARED RAYS (FIR)?

Within the magnetic spectrum, some rays, such as light, can be seen by the unaided human eye. Most, however, are totally invisible to us. Far Infrared Rays (FIR) are well beyond the ability of the naked eye to see. FIR gently and delightfully provide a warm comfortable feeling. FIR can also generate a feeling of well being throughout the body. Now that FIR's outstanding properties are gaining worldwide recognition and acclaim, we are beginning to see it appear in a wide variety of applications.

HotHouse™? Because the HotHouse™ really works - and it is simple and convenient to operate. If you are looking for a perfect adjunct to massage or other manipulative modalities, the HotHouse™ is perfect for you.

ENJOY THE WARM, COMFORTABLE, FEELING IN YOUR OWN HOME!

The FIR Topical Warming Unit (HotHouse™) produces its unique effect through radiant FIR heat. Its unique arched design enhances the thermal-effect. You get total enjoyment - it is easy to use and very comfortable. It makes you feel absolutely terrific! Why are we hearing so many wonderful and positive things from the many devoted users of the

Manufactured under a Japan technology patent, the HotHouse™ has earned popular and professional acclaim in Japan after many years of successful use. Today it is classified

as a Class 2 Medical Device in Canada.

SPECIAL FEATURES:

- **The Importance of 8~10 micron Far Infrared Rays:**

Normal human body temperature is 98.6°F. Most of our body heat is typically radiated away in far infrared range at the 8 ~ 10 micron wavelength. That is why a room full of people becomes warm. So, if we generate 8 ~ 10 micron far infrared and direct it at a human body, it matches the radiant energy leaving the body and is best for the body's overall comfort.

- **Why the Warm, Comfortable Thermal Feeling?**

The "Super Radiant Heating Surface" is covered with a very fine, multi-faceted, acute-angle silicon surface manufactured in New Mexico. When rays are scattered in all directions by the countless surfaces created by these silicon crystals, the effectiveness of the 160 degree span is amplified. The radiant transmission area is increased some 10-fold. It simply wouldn't be possible to produce the effective warmth of the HotHouse™ without the combination of these two design concepts: proper wavelength and a special reflective silicon surface.

- **Electronically Controlled & Contains Safety Feature:**

The surface temperature is automatically controlled by a built-in, specially-designed regulator which only allows a set temperature while a safety device precludes any chance of overheating due to a malfunction.

- **Simple To Operate:**

The FIR Topical Warming Unit (HotHouse™) provides its warmth without ever having to touch the skin. Just set the timer and relax. So simple and convenient, it consumes a mere 5 cents worth of electricity per hour!

- **Small and Portable:**

This is NOT like the huge FIR instruments you may have seen elsewhere. Ours is entirely new and sized just right for home use. You will be thrilled with the unique qualities of the HotHouse™. It is a must for your home!

- **A Wider, 160 Degree Heating Surface:**

The arched 160 degree design greatly increases warming coverage. This unique design is the hallmark of the HotHouse™.

DIRECTIONS:

Maximum: 15-60 minutes, twice daily. You will experience warmth and comfort, similar to the feeling you get from a good massage. Use it on a regular basis. A very slight reddening of the skin is normal.

WARNING: This device should NOT be used if you have any acute diseases, open sores, a serious heart condition, are using a pace-maker, or have serious high blood pressure.

God so loved the world that He gave... John 3:16
